to the discrimination against or financial penalisation of parents who choose not to vaccinate.

#freedomofchoice

in our children's health care and wellbeing

The right to informed consent for vaccination, free of coercion, is being removed from the government's new childcare package. Only medical exemptions will apply after 1 Jan 2016 in the proposed legislation.

Consent to vaccination must be given voluntarily in the absence of undue pressure, coercion or manipulation (Australian Immunisation Handbook).

Yet only parents who vaccinate their children with the 'full' schedule of vaccines (11 recommended in the first year of life) will be entitled to welfare benefits and childcare payments under this legislation. This is a discriminatory welfare policy that breaches the International Covenant on Economic, Cultural and Social Rights (ICECSR).
